Arthur G. Steinberg, Ph.D.  
Department of Biology  
Case Western Reserve University  
Cleveland, Ohio 44106

Dear Dr. Steinberg:

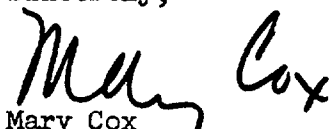

We see no difficulty at all in meeting Dr. Lederberg's request that he be able to publish in somewhat different form in a future book the material that will make up his contribution to volume 10 of Progress in Medical Genetics.

It is, in fact, our standard policy to give any Grune & Stratton author permission to reprint his own material, without charge. In this case, all we would ask is that somewhere in his book Dr. Lederberg acknowledge the original appearance of the material in the Progress volume.

We look forward with pleasure to having Dr. Lederberg's work in the series and hope that this letter allays any anxieties he might have about the future use of his work.

With all best wishes,

Sincerely,

  
Mary Cox  
Managing Editor
